Acknowledgement

On the very outset of this report, I would like to extend my sincere & heartfelt obligation towards all the personages who have helped me in this endeavor. Without their active guidance, help, cooperation & encouragement, I would not have made headway in the project.

I am grateful to my project **Guide (DR. SONALI B. GUNJAL)** for the guidance, inspiration and constructive suggestions that helped me in the preparation of this project.

I express my thanks to the principle **Dr. D.R.Sonwane** for extending his support.

I also acknowledge with a deep sense of reverence, my gratitude towards my parents and member of my family, who has always supported me morally as well as economically. At last but not least gratitude goes to all of my friends who directly or indirectly helped me to complete this project report. Any omission in this brief acknowledgement does not mean lack of gratitude.

For RESTAURANT WEBSITE Designing based on HTML and CSS

Hypertext Markup language(HTML) is the standard markup language for creating webpages and web application. With Cascading style sheet(CSS) and java script, it forms a triad of cornerstone technologies for the world wide web. Web browser receive HTML document from a web server or from local storage and render them into multimedia web pages HTML describes the structure of web page semantically and originally and included cues for the appearance of the document.

HTML can embed programs written in a scripting language such as java script which affect the behavior and content of web pages. Inclusion of CSS defines the look and layout of content the world wide web Consortium(W3C), maintainer both the HTML and CSS standards, has encouraged the use of CSS over explicit presentational HTML since 1997.

Brief overview of technology:

Front end:HTML CSS,BOOTSTRAP

HTML:HTML is used to create and save web document.Eg. Notepad /Notepad++ CSS:(Cascading style sheet)Create a attractive layout.

Why use HTML?

HTML is use to create electronic documents(Called Pages)that are display on the world wide web.Each Page contains a series of conections to other pages called Hyperlink. Every you see on internet is written using one version of HTML code or another.

HTML code ensure thhe proper formatting of text and images so that your internet browser may display them they are intended to look. Without HTML a

browserwould not know how to display test as a element or load images or other elements.HTML also provides a basic structure of the page upon which cascading style sheet are overlaid to change its appers.

Existing System

The work is done manually

Student will visit the web page and fill their two type Forms.

Example. Form 1" For the student will be filling for Living certificates And benefited Certificate

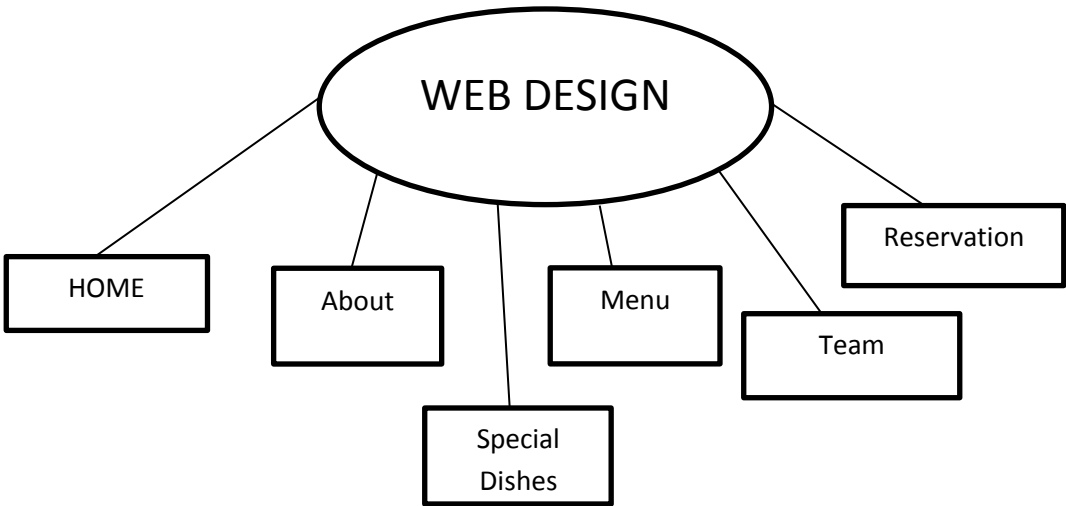

Form 2 for the new student admissions will be apply Ex. 10" Passed student will be apply and UG courses for the same application

But You select you want take take which class Admission Like 11" select streme (arts science mcvc) same for the UG Courses

Admin will collect all student Admissions data database.

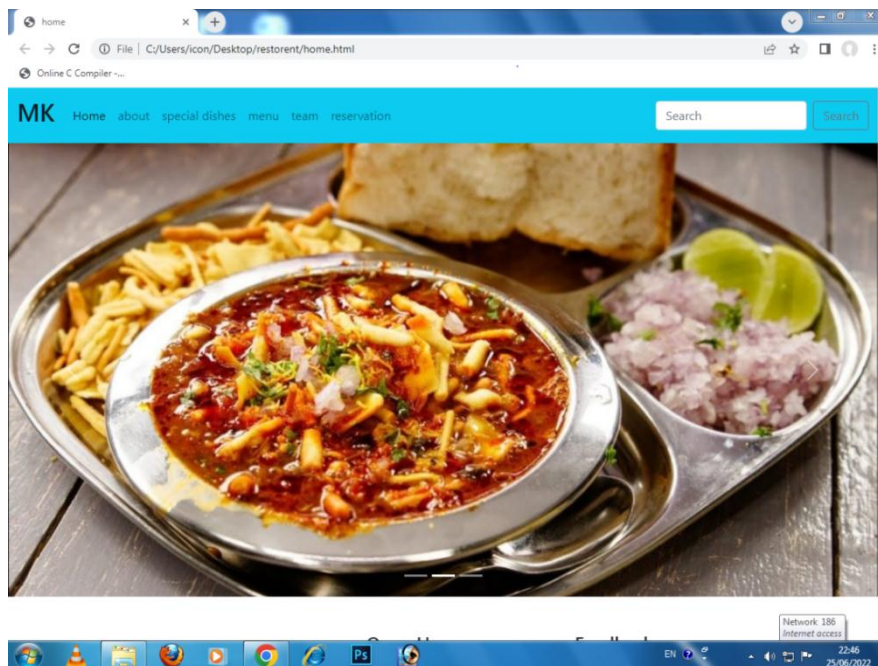

Printing Process will take Place,

PuranPoli</h2>

<p class="lead">Puranpoli is the special dish of Maharashtra which is prepared on every occasion at every house especially during festivals such as Ganesh Chaturthi and Holi. It is eaten with Basundi, Aamras, Kadhi, Amti, etc. In Pune, Puran Poli is eaten with a variant of Amti (flavored sour curry) known as Katachi Amti is prepared with the remaining water of Chana Dal used to make Puran. In the Vidarbha region of Maharashtra, jaggery is used in puran poli for sweetness, it is eaten with Wada - a pakora made of all lentils.</p>
